Preliminary Final Report

For the year ended 31 December 2014

Cyclopharm Limited and its Controlled Entities
ABN 74 116 931 250

Managing Director's Report

Appendix 4E Commentary
Full Year Results of
Cyclopharm Limited and its Controlled Entities ("Company")
For the 12 months ended 31 December 2014

Features

Dear Shareholders,

Your company made significant achievements in 2014 as it executed its strategy of focusing our operations on our core profitable activities; driving cash generative organic growth; entering high value markets with exciting products; and accelerating the progress of bringing new patented technologies to market.

These achievements have resulted in Cyclopharm reporting record Sales, EBITDA, and NPAT while establishing a platform for ongoing profitable and cash generative growth. The Company's reported NPAT for the year was $4,065,563 (vs a 2013 restated loss of $10,118,521). This represents Earnings Per Share of 7.03 cents.

The Board expects that these pleasing results will enable it to consider, in the coming year, capital management initiatives or other financial measures to deliver ongoing returns to shareholders, while also investing in near term profitable growth opportunities.

Group Financial Performance

Key highlights of our financial results for the 2014 year included:

- Record sales of $12.05 million
- Record Technegas division Operating EBITDA[1] of $1.94 million
- Record NPAT of $4.07 million (vs 2013 loss of $10.12m) which is largely comprised of NPAT from the Technegas division of $2.38 million and net litigation proceeds of $2.19 million
- Technegas division operating expenses down 5.3% vs 2013
- Cashflow from operations of $4.47 million predominantly comprised of operating cash generated by the Technegas division of $4.05 million
- NAB debt fully repaid with net cash of $3.27 million recorded at year end.

The combined sales of the Company's key products, TechnegasPlus generators (Generators) and Patient Administration Sets (PAS), was $11.49 million. This was 10.0% higher than in 2013, assisted by an increase in sales of Generators in North America, local price increases and favourable foreign exchange impacts. PAS sales remain the major source of revenue for the Technegas division, comprising 82% of revenue in 2014. The Molecular Imaging business operating as Cyclopet contributed revenues of $556,607 in the four months of the year prior to its cessation in April 2014.

With the closure of commercial operations at our cyclotron facility, Technegas division sales contributed 95% (2013: 88%) of group sales for the 2014 financial year. The following table outlines the group's consolidated performance on a comparative financial year basis:

Full Year ended 31 December	**Restated 2013**	**2014**
	$'000	$'000
Net (Loss) / Profit Before Tax	(10,265)	3,470
Add back: MMI (share) / reversal of loss of associate	263	(60)
Add back: Impairment charge - Molecular Imaging property, plant and equipment	8,860	-
Add back: Molecular Imaging Division - other income	-	(2,895)
Add back: Molecular Imaging Division operating loss	2,672	1,397
Technegas Division Net Profit Before Tax	1,530	1,912

[1] Operating EBITDA = Reported Earnings before Interest, Tax and Depreciation and Amortisation of $3.9 million less net one-off items of $2.0 million.

Despite increasing year-on-year revenue by 10%, Technegas' operating expenses were in line with the prior year at $5.33 million as a result of our ongoing cost containment measures. Consequently, OPEX as a percentage of sales decreased to 46.1% in 2014 from 51.4% in 2013.

Cashflow from operations of $4.47 million predominantly comprised of operating cash generated by the Technegas division of $4.05 million and the receipt of Cyclopet settlement proceeds enabled the company to fully repay all outstanding NAB debt and finish the year with a net cash balance of $3.27 million.

Group Operating Performance

During the financial year, Cyclopharm's core operations performed strongly and issues that previously impeded our progress have now been addressed. In this regard, operating highlights for the year include:

- Final settlement of the Cyclopet dispute with ANSTO / Petnet Australia resulting in payment of $2.65 million to Cyclopharm
- Strong growth in international sales of Technegas with Canada now representing our no.1 market
- Start of Technegas COPD trials in China
- Progress in obtaining FDA approval for Technegas in the US market
- Secured IP protection for Cyclopharm's high value Ultralute technology
- Cashflow from operations of $4.47 million predominantly comprised of operating cash generated by the Technegas division of $4.05 million
- NPAT of $4.07 million which is largely comprised of NPAT from the Technegas division of $2.38 million and net litigation proceeds of $2.19 million.

Sales volumes and gross margins from our Technegas business grew strongly over the year, driven by expansion of our presence in the Canadian market and higher margins in all markets. Local prices of generators increased by between 15% and 18% in Europe (EUR) and Asia (AUD), PAS prices in Asia increased substantially as a result of management's decision to alter the distribution channel in key Asian markets in favour of agency agreements. Latin America despite representing a modest overall percentage of revenue, PAS pricing increased 12% during 2014. The overall improvement in margins were further assisted by favorable foreign exchange movements and stable operating costs.

Our progress in expanding Technegas into new markets and for new diagnostic purposes took significant steps forward in 2014. The Company began trials in China for the use of Technegas in the diagnosis and management of chronic obstructive pulmonary disease. These trials are expected to be completed in the last quarter of 2015. Cyclopharm also continues to make important progress on the path to obtaining FDA approval to sell Technegas in the US market. FDA clinical trials are expected to be completed early 2016 and the Company is actively considering ways to accelerate entry into that market.

The Group's profit before tax of $3.47 million was enhanced by the $2.65 million settlement proceeds received from the successful Cyclopet mediation in late August 2014. A substantial portion of the settlement proceeds was applied to retire the group's outstanding bank loan of $1.5 million.

Once operational, we expect to continue to utilise the Cyclotron facility at Macquarie University Hospital to progress some of the company's research and development activities until we determine the longer-term future of the facility, which could result in the sale of the asset.

The Company is moving towards commercial production of our Ultralute™ technology and expects to commence sales to Europe in the fourth quarter of 2015. We are excited about its potential to form the basis of the Group's next stage of growth.

Summary

2014 represented a significant turning point for Cyclopharm. Our business is focussed, more profitable and our balance sheet is strong.

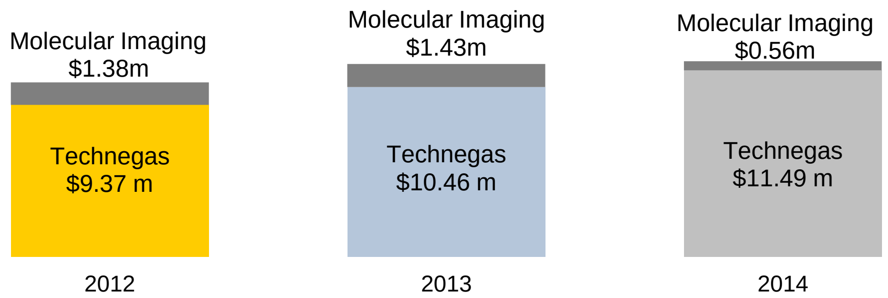
The Company's core Technegas business reported record sales and profit and, we expect we will further improve our foundation product's operational and financial performance in 2015. In 2014 we made significant progress towards entering new markets, such as Russia, China, Japan, and the USA and expanding the use of Technegas to new diagnostic purposes. Going forward, further expansion of international sales of Technegas and the market launch of Ultralute™ provide the opportunity to further improve our financial performance.

With resolution of the Cyclopet dispute with ANSTO / Petnet Australia, our financial position is strong. The Board expects our cash balance will be further bolstered by growing consolidated cash flows from operations and any proceeds from a divestment of our cyclotron facilities. This improved cash position would provide the opportunity to consider alternatives to best distribute value to shareholders and fund further growth initiatives.

I look forward to updating you further during the year as the business gains momentum in delivering on our tangible growth objectives.

Segment Review

Group Revenue by Segment



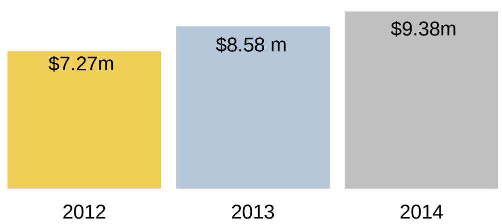
Group Revenue by segment

TECHNEGAS

Technegas is a lung imaging device used primarily to diagnose the presence of blood clots in the lungs known as Pulmonary Emboli (PE). For the last 27 years, over 3,000,000 patients have benefited from the Technegas system. Technegas lung imaging is an alternative to Computed Tomography Pulmonary Angiogram ("CTPA") that avoids numerous contraindications attributed to CTPA and addresses the concerns relating to the high levels of radiation exposure resulting from a CTPA exam. Technegas's continued growth in sales demonstrates its ongoing relevance to the medical industry and provides the Company with secure and growing sales and cash flows.

Revenue Composition

Sales revenue of $11.49 million from the segment's key products, PAS and Generators, grew by 10% over the preceding year (2013: $10.46 million). Gross profit margins as a percentage of sales increased from 75% to 77% in 2014.



Group, PAS Revenue

Revenue from PAS and its consumables represented 82% of the segment's revenue in 2014 and was 9% higher at $9.38 million in 2014 compared to 2013 ($8.58 million) due to increased PAS prices in Asia and Latin America and favourable foreign exchange movements. PAS prices increased by 74% in Asia and 12% in Latin America. Volumes remained relatively stable at 189,200 units (2013: 192,550 units). There was a favourable 7% change in the value of the Euro to Australian Dollar.

Managing Director's Report
Continued

Group, Technegas and Other

Technegas Generator sales and other revenue was $2.12 million for the year, up 12.4% on the prior year (2013: $1.87 million). The increase was a result of higher unit sales than the prior year (up 46% to 51 units) and price increases in Germany, Europe and Asia. This was partly offset by a fall in service revenue to $0.70 million (2013: $1.04 million). An additional 11 generators were sold in North America and 5 additional generators sold in France compared to the prior period.

Regional Review

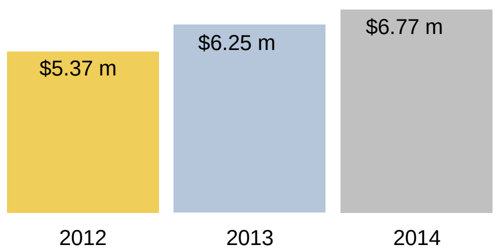
Application to sell Technegas in the USA

Cyclopharm announced to the Australian Securities Exchange in November 2012 that the Technegas Clinical trial required for market entry into the United States had commenced at New York's Presbyterian/Columbia University Medical Center. A total of 750 patients were required for the study. Despite screening numerous patients and modifying the enrolment requirements last year, fewer than 30 patients were imaged. To address the low patient recruitment issue, Cyclopharm met with the FDA in September 2014 to propose significant modification to the clinical trial program which, if accepted, should result in a simplified study that will ultimately allow for an expedited and less costly path to market approval.

The Company remains confident that its application for market entry into the United States will ultimately be successful. As the USA represents a major growth opportunity, the Directors are determined to continue to drive hard for FDA approval but will ensure we do so cautiously and prudently.

Going forward, the Directors advise that further expenditure on the FDA trials will be expensed until FDA approval is achieved, notwithstanding the confidence of the Directors that such approval will ultimately be given.

Europe



Europe, Total Revenue

Approximately 60% of sales revenue is derived in Europe (2013: 61%). Overall sales revenue was 8% higher at $6.77m (2013: $6.25m). Generator sales were higher with 24 sold in 2014 compared with 20 in the prior year. 2,089 PAS boxes were sold in Europe in 2014, 3% fewer than 2013 (2,161 PAS boxes). Sales revenue was positively impacted by an increase in local prices of generators and an approximate 7% movement in the Australian dollar relative to the Euro.

North America – Canada

North America, Total Revenue

12 generators (2013: 1) and 838 PAS boxes (2013: 800) were sold in Canada in 2014. The improvement in PAS sales in this region represents the 11th consecutive year of growth. On a country basis, Canada has overtaken France as the largest Technegas market globally. Canada recorded total revenue of $2.21 million in 2014 (2013: $1.74 million). The Directors are very pleased with the success of Technegas in Canada and are confident this is a strong indicator for anticipated take up rates in the United States following approval to sell Technegas in that market.

Asia Pacific

Asia Pacific, Total Revenue

Revenues in the Asia Pacific region grew by 2% in 2014. In Australia, where Technegas enjoys a very high market share, revenues fell by 2% as a result of two fewer generator sales in 2014 (8 units) compared to 2013 (10 units). This was partly offset by a 3% increase in PAS boxes sold in 2014 (646 PAS boxes) compared to 2013 (627 PAS boxes). In Asia, sales revenue increased by 33%, substantially due to the price increase in China from US$500 to A$1,680 per set following the change in our business model from distributorship to agency. Approval from the Japanese regulatory authorities for the TechnegasPlus Generator was received in October 2013 and we expect strong sales growth in Japan in the near future.

New Indication for Technegas

We continue to develop new diagnostic purposes for Technegas. Other disease states beyond pulmonary embolism, including Chronic Obstructive Pulmonary Disease ("COPD") and Lung Cancer have significant market potential for Technegas and are being targeted through clinical studies now underway.

In May 2013 we were delighted to announce we had initiated a pilot clinical trial in China, targeting the use of Technegas for the diagnosis of COPD.

The start of this trial coincided with the results of a study published in the North American Journal of Nuclear Medicine by Canadian researchers from McMaster University and the Firestone Institute for Respiratory Health, which demonstrated that Technegas detected changes in lung ventilation and perfusion before structural changes in the lungs were detected by CT scans. Furthermore, a recent study published in the January 2015 Annals of Nuclear Medicine from researchers at Skane Unviversity Hospital and Lund University found that ventilation scans with Technegas can detect ventilatory impairment and airway obstruction even in apparently healthy long-term smokers not shown with spirometry or CT scans. Stated simply, Technegas has the potential to be used not only for early diagnosis of COPD but also on a recurrent basis for COPD management. The opportunity presented by these discoveries may lead to a significant expansion of the use of Technegas globally. The COPD diagnosis market is 15 to 20 times larger than the market in which Technegas is currently predominantly used. In Australia, 1 in 5 Australians can expect to suffer from COPD in their lifetime and in China it has been estimated that there will be 65 million deaths from COPD and 18 million deaths from lung cancer between 2003 and 2033. We hope Technegas will be able to assist in reducing that toll.

Site initiation at five hospitals in China was completed in February 2014 and patient recruitment is in progress. A preliminary report is expected in the second quarter of 2015 with a final report to be published in the fourth quarter of 2015. We look forward to providing you updates as they become available.

ULTRALUTE™

Almost 2 years since the development project commenced we were delighted to announce in April 2013 the development and patenting of a new Nuclear Medicine technology – Ultralute™.

Cyclopharm finalised the design of the Ultralute™ technology in 2014 following extensive testing and prototype designs which provided exceptional results. The Company is now moving towards commercial production with sales in Europe expected to commence in Q4 2015.

Cyclopharm's Ultralute™ technology extends the useful life of Mollybdenum-99 (Mo-99) generators, which have a half-life of around 2.75 days, by up to 50%. Mo-99 generators are used to harvest Technetium-99m or Tc-99m, which accounts for approximately 80% of all nuclear medicine diagnostic imaging procedures.

Global industry interest in our Ultralute™ technology is strong and continues to accelerate. The Company is therefore very excited by the commercial prospects for Ultralute™ and is confident it provides Cyclopharm with the basis for outstanding shareholder returns.

JOINT VENTURE - MACQUARIE MEDICAL IMAGING

Cyclopharm's medical imaging joint venture, MMI, provides patients at Macquarie University Hospital and neighbouring suburbs access to state of the art imaging facilities including 3T MRI, CT, X-ray, Ultrasound and Positron Emission Tomography (PET) scanning.

Growth in MMI is tied closely to the hospital's ramp-up. Sales revenue continues to increase as initiatives being implemented at MUH, including a new breast cancer clinic and expanded specialties such as cardiothoracic services, cancer care services and expanded PET indications take effect.

The joint venture is accounted for on an equity basis due to Cyclopharm's minority shareholding. As a result, MMI's full accounts are not consolidated into our accounts. During the year, Cyclopet Pty Ltd received a repayment of $60,000 which it had loaned to Macquarie Medical Imaging in 2013. A share of the associate's losses had been recognised under the equity method in 2013 as it was not expected to be repaid in the short term. The share of the associate's losses has been reversed during the current year in view of the amount received.

MOLECULAR IMAGING TRADING AS CYCLOPET

As we announced in April 2014, the Directors decided to cease operations of the Company's Cyclopet business, which was located at Macquarie University Hospital. Cyclopet's market had been adversely impacted for a number of years by the competitive activity of Government owned enterprises. Despite receiving a favourable finding supporting our claims by the Productivity Commission in 2012, the company found it necessary to commence legal proceedings in the Federal Court against Petnet Australia, the wholly owned subsidiary of Australian Nuclear Science and Technology Organisation (ANSTO). Despite legal proceedings afoot, in the Directors' opinion, there was little prospect for improved market conditions in the short term and it was in the best interest of shareholders that Cyclopet's operations cease.

Notwithstanding this decision, the Cyclotron facility had recorded sales growth during its final 4 months of operations, with the number of Fluoro Deoxy Glucose (FDG) patient doses sold improving by 12% from 1,860 doses (in the year to April 2013) to 2,077 doses (year to April 2014). The division's 2014 underlying operating loss before tax and finance costs was $1.40 million.

On 26 August 2014 Cyclopharm announced to the ASX that after a successful mediation, Petnet Australia and ANSTO had agreed to settle the legal proceedings we had initiated against them. These parties have paid $2.65 million to Cyclopet and those legal proceedings have been discontinued.

In addition to the settlement, we announced on 20 June 2014 that substantial water damage occurred to our cyclotron facility following attempts by the authorities to extinguish a fire in the carpark on the floor above the facility. The cyclotron facility was fully insured and on 16 September 2014 we announced that the insurer, QBE accepted liability for the costs to fully reinstate our cleanrooms and laboratory facilities. Work is currently in progress and the facilities are expected to be fully reinstated late 2015.

Once operational, we expect to continue to utilise the Cyclotron facility at Macquarie University Hospital to progress some of the company's research and development activities until we determine the longer-term future of the facility, which could result in the sale of the asset.

OUTLOOK

In 2014 Cyclopharm became a much simpler and more profitable Company, as evidenced by our impressive current record year operating results. The Company is now in a significantly stronger position to realise the potential of our highly profitable and cash-generating Technegas business in international markets and to continue the development of our patented Ultralute™ technology.

In 2015 we expect consistent growth in Technegas revenues from continued strong performance in Canada and targeted marketing in Europe and Asia. Simultaneously, we will actively pursue the regulatory approvals required to commence sales in Russia.

In late 2015 we expect to begin commercial production of the Ultralute™ technology. During the year we will also continue to progress discussions with potential commercial partners for this technology.

The opportunities for developing additional diagnostic purposes for Technegas to include COPD will be a key priority for the company. If successful, the potential to expand Technegas's revenue and profitability over the medium to longer term is significant.

We look forward to introducing Technegas to the United States market following successful completion of our Phase 3 clinical trial and subsequent approval by the FDA. We met with the FDA in September 2014 to discuss an alternative clinical trial methodology that, if agreed, would provide us with a less complicated and less costly pathway to FDA approval. I look forward to updating shareholders following the outcome of our FDA discussions.

The Directors maintain their view that FDA approval to sell Technegas into the USA market provides Cyclopharm with the opportunity to significantly expand its sales and profitability. However, we wish to highlight that as expenditure incurred in relation to the FDA trials will be expensed rather than capitalised, Cyclopharm's results will be adversely impacted when clinical trials ramp up in 2015. The Directors are currently evaluating options to fund the FDA trials.

This past year represents a fundamental change of fortunes for Cyclopharm. With the support of shareholders, over the past few years the company's management team has addressed the roadblocks that impacted our profitability, repositioned our core operations in growth markets, and accelerated the development and launch of exciting new high value products. These results of efforts are now becoming evident in our operations and cash flows. Over the coming years, the Directors anticipate Cyclopharm will continue to report further outstanding results which will place the Company in a sound position to deliver growing financial rewards to our shareholders.

The Statement of Changes in Equity is to be read in conjunction with the notes to the financial statements.

1. **CORPORATE INFORMATION**

Cyclopharm Limited is a Company limited by shares incorporated and domiciled in Australia. The shares are publicly traded on the Australian Securities Exchange ("ASX") under the code "CYC".

During the year, the principal continuing activities of the consolidated entity (the "Group") consisted of the manufacture and sale of medical equipment and radiopharmaceuticals, including associated research and development.

2. **SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

a) Basis of Preparation

The financial statements are general purpose financial statements that have been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board (AASB) and the Corporations Act 2001. The Group is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in financial statements containing relevant and reliable information about transactions, events and conditions. Compliance with Australian Accounting Standards ensures that the financial statements and notes also comply with International Financial Reporting Standards as issued by the IASB. Material accounting policies adopted in the preparation of these financial statements are presented below and have been consistently applied unless stated otherwise.

Except for cash flow information, the financial statements have been prepared on an accruals basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

The financial report is presented in Australian dollars.

Change in Accounting Policy

The Group voluntarily changed its accounting policy relating to the capitalised expenditure of the Ultralute and New Technegas Generator development projects, whereby the expenditure was reclassified as intangible development assets under AASB 138: Intangible Assets for the year ended 31 December 2014. For the previous financial year ended 31 December 2013, the expenditure was classified as capital work in progress within property, plant and equipment. This change has been implemented as the Board has determined it is appropriate to classify and present all development assets as intangible development assets from the commencement of rather than upon the completion of the development activities. A useful life has not been determined as the development projects are not yet complete. The Directors are satisfied that future economic benefits will eventuate to justify the carrying value of the capitalised expenditure of these projects.

The table below provides a summary of the amounts of the adjustments for each financial statement line item affected by the reclassification of the Ultralute and New Technegas Generator development expenditure as intangible development assets for the year ended 31 December 2014, as well as the comparative period for the year ended 31 December 2013:

	As at 1 January 2013		
	Under Previous Accounting Policy	Effect of Change in Accounting Policy AASB138	As Presented
	$	$	$
Property, plant and equipment	9,526,942	(173,915)	9,353,027
Intangible development assets	194,455	173,915	368,370

Critical Accounting Estimates and Judgments

Prior Period Error

As a result of a review by ASIC of Cyclopharm's 2013 Annual Report, ASIC has determined that in its opinion the FDA approval process expenditure does not meet the definition of an intangible asset under AASB 138: Intangible Assets. The Board of Cyclopharm has accepted this determination. Consequently, an adjustment has been made in the 2014 half year financial report to rectify a material prior period error by de-recognising the previously capitalised FDA costs of $3,380,387 as at 1 January 2014.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

b) New and Amended Accounting Policies Adopted by the Group

Consolidated financial statements

The Group has adopted the following new and revised Australian Accounting Standards from 1 January 2014 together with the consequential amendments to other Standards:

- AASB 2012-3: *Amendments to Australian Accounting Standards – Offsetting Financial Assets and Financial Liabilities;*
- Interpretation 21: *Levies;*
- AASB 2013-3: *Amendments to AASB 136 – Recoverable Amount Disclosures for Non-Financial Assets;*
- AASB 2013-4: *Amendments to Australian Accounting Standards – Novation of Derivatives and Continuation of Hedge Accounting and*
- AASB 2013-5: *Amendments to Australian Accounting Standards – Investment Entities.*

These Standards are mandatorily applicable from 1 January 2014 and thus, became applicable to the Group for the first time in the current half-year reporting period. An assessment of the potential impact are discussed below:

- AASB 2012-3: *Amendments to Australian Accounting Standards – Offsetting Financial Assets and Financial Liabilities*

  This Standard provides clarifying guidance relating to the offsetting of financial instruments, which is not expected to impact the Group's financial statements.

- Interpretation 21: *Levies*

  Interpretation 21 clarifies the circumstances under which a liability to pay a levy imposed by a government should be recognised, and whether that liability should be recognised in full at a specific date or progressively over a period of time. This Interpretation is not expected to significantly impact the Group's financial statements.

- AASB 2013-3: *Amendments to AASB 136 – Recoverable Amount Disclosures for Non-Financial Assets*

  This Standard amends the disclosure requirements in AASB 136: *Impairment of Assets* pertaining to the use of fair value in impairment assessment and is not expected to significantly impact the Group's financial statements.

- AASB 2013-4: *Amendments to Australian Accounting Standards – Novation of Derivatives and Continuation of Hedge Accounting*

  AASB 2013-4 makes amendments to AASB 139: *Financial Instruments: Recognition and Measurement* to permit the continuation of hedge accounting in circumstances where a derivative, which has been designated as a hedging instrument, is novated from one counterparty to a central counterparty as a consequence of laws or regulations. This Standard is not expected to significantly impact the Group's financial statements.

- AASB 2013-5: *Amendments to Australian Accounting Standards – Investment Entities*

  AASB 2013-5 amends AASB 10: *Consolidated Financial Statements* to define an "investment entity" and requires, with limited exceptions, that the subsidiaries of such entities be accounting for at fair value through profit or loss in accordance with AASB 9 and not be consolidated. Additional disclosures are also required. As neither the parent nor its subsidiaries meet the definition of an investment entity, this Standard is not expected to significantly impact the Group's financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

c) New Accounting Standards for Application in Future Periods

Accounting Standards and Interpretations issued by the AASB that are not yet mandatorily applicable to the Group, together with an assessment of the potential impact of such pronouncements on the Group when adopted in future periods, are discussed below:

- AASB 9: *Financial Instruments* and associated Amending Standards (applicable to annual reporting periods beginning on or after 1 January 2018, as further amended by Part E of AASB 2014-1).

  The Standard will be applicable retrospectively (subject to the provisions on hedge accounting outlined below) and includes revised requirements for the classification and measurement of financial instruments, revised recognition and derecognition requirements for financial instruments and simplified requirements for hedge accounting.

  The key changes made to the Standard that may affect the Group on initial application include certain simplifications to the classification of financial assets, simplifications to the accounting of embedded derivatives, and the irrevocable election to recognise gains and losses on investments in equity instruments that are not held for trading in other comprehensive income. AASB 9 also introduces a new model for hedge accounting that will allow greater flexibility in the ability to hedge risk, particularly with respect to hedges of non-financial items. Should the entity elect to change its hedge policies in line with the new hedge accounting requirements of AASB 9, the application of such accounting would be largely prospective. This part is not expected to have a significant impact on the Group's financial statements as the Group does not currently hedge any transactions.

  Although the directors anticipate that the adoption of AASB 9 may have an impact on the Group's financial instruments, including hedging activity, it is impracticable at this stage to provide a reasonable estimate of such impact.

- AASB 2014-1: *Amendments to Australian Accounting Standards*

  Part A of this Standard is applicable to annual reporting periods beginning on or after 1 July 2014 and makes the following significant amendments:

  - revises/adds the definitions of the terms "market condition", "performance condition" and "service condition" in AASB 2: *Share-based Payment*;
  - clarifies that contingent considerations arising in a business combination should be accounted for as items of equity or liability and not as provisions in accordance with AASB 137: *Provisions, Contingent Liabilities and Contingent Assets*;
  - requires additional disclosures when an entity aggregates its operating segments into one reportable segment in accordance with AASB 8: *Operating Segments*; and
  - includes an entity that provides key management personnel services (a "management entity") to a reporting entity (or a parent of the reporting entity) within the definition of a "related party" in AASB 124: *Related Party Disclosures*.

  This part also makes other editorial corrections to various Australian Accounting Standards; however, it is not expected to have a significant impact on the Group's financial statements.

  Part B of this Standard is applicable to annual reporting periods beginning on or after 1 July 2014 and permits an entity to recognise the amount of contributions from employees or third parties in a defined benefit plan as a reduction in service cost for the period in which the related service is rendered, if the amount of contributions is independent of the number of years of service. This part is not expected to have a significant impact on the Group's financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Part C of this Standard is applicable to annual reporting periods beginning on or after 1 July 2014 and deletes the reference to AASB 1031: *Materiality* in particular Australian Accounting Standards. This part is not expected to have a significant impact on the Group's financial statements.

Part D of this Standard is applicable to annual reporting periods beginning on or after 1 January 2016 and makes amendments to AASB 1: *First-time Adoption of Australian Accounting Standards*, which arise from the issuance of AASB 14: *Regulatory Deferral Accounts* in June 2014. AASB 14 permits first-time adopters to continue to account for amounts related to rate regulation in accordance with their previous GAAP when they adopt Australian Accounting Standards. In line with management's assessment of AASB 14, this part is not expected to have a significant impact on the Group's financial statements.

Part E of this Standard is applicable to annual reporting periods beginning on or after 1 January 2015 and defers the application date of AASB 9 (December 2010) to annual reporting periods beginning on or after 1 January 2018. This part also makes consequential amendments to hedge accounting disclosures set out in AASB 7: *Financial Instruments: Disclosures*, and to AASB 132: *Financial Instruments: Presentation* to permit irrevocable designation of "own use contracts" as measured at fair value through profit or loss if the designation eliminates or significantly reduces an accounting mismatch. Management believes that there will not be any significant impact on the Group's financial statements on adoption of this part of the Standard.

- AASB 2014-3: *Amendments to Australian Accounting Standards – Accounting for Acquisitions of Interests in Joint Operations*

  This Standard is applicable to annual reporting periods beginning on or after 1 January 2016. It amends AASB 11: *Joint Arrangements* to require the acquirer of an interest (both initial and additional) in a joint operation in which the activity constitutes a business, as defined in AASB 3: *Business Combinations*, to apply all of the principles on business combinations accounting in AASB 3 and other Australian Accounting Standards except for those principles that conflict with the guidance in AASB 11; and disclose the information required by AASB 3 and other Australian Accounting Standards for business combinations. Since adoption of this Standard would impact only acquisition of interests in joint operations on or after 1 January 2016, management believes it is impracticable at this stage to provide a reasonable estimate of such impact on the Group's financial statements.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

d) Basis of consolidation

The consolidated financial statements comprise the financial statements of Cyclopharm and its subsidiaries as at 31 December each year ('the Group').

Subsidiaries are entities the parent controls. The parent controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Subsidiaries

Subsidiaries are consolidated from the date on which control is transferred to the Group and cease to be consolidated from the date on which control is transferred out of the Group. Where there is loss of control of a subsidiary, the consolidated financial statements include the results for the part of the reporting period during which Cyclopharm has control.

The financial statements of subsidiaries are prepared for the same reporting period as the parent Company, using consistent accounting policies. Adjustments are made to bring into line any dissimilar accounting policies that may exist.

Transactions eliminated on consolidation

All intercompany balances and transactions, including unrealised profits arising from intra-group transactions, have been eliminated in full. Unrealised losses are eliminated unless costs cannot be recovered.

For business combinations involving entities under common control, which are outside the scope of *AASB 3 Business Combinations*, the Company applies the purchase method of accounting by the legal parent.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

e) Foreign currency translation

Functional and presentation currency

The functional currency of each of the group's entities is measured using the currency of the primary economic environment in which that entity operates. The consolidated financial statements are presented in Australian dollars (Aud $) which is the parent entity's functional and presentation currency.

Transactions and balances

Transactions in foreign currencies are initially recorded in the functional currency at the exchange rates ruling at the date of the transaction. Foreign currency monetary items are translated at the year-end exchange rate. Non-monetary items that are measured in terms of historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate when the fair value was determined.

Exchange differences arising on the translation of monetary items are recognised in the Statement of Comprehensive Income, except where deferred in equity as a qualifying cash flow hedge or net investment hedge. On disposal of a foreign entity the deferred cumulative amount in equity is recognised in the Statement of Comprehensive Income.

Group companies

The functional currency of the overseas subsidiaries Cyclomedica Ireland Limited, Cyclomedica Germany GmbH, Cyclomedica Europe Limited, is European Euro (Euro €) and Cyclomedica Canada Limited is Canadian dollars (Can $).

The financial results and position of foreign operations whose functional currency is different from the group's presentation currency are translated as follows:

- Assets and liabilities are translated at year-end exchange rates prevailing at that reporting date.
- Income and expenses are translated at the weighted average exchange rates for the period.
- Retained profits/equity are translated at the exchange rates prevailing at the date of the transaction.

Exchange differences arising on the translation of foreign operations are recognised in other comprehensive income and are transferred directly to the group's foreign currency translation reserve in the Statement of Financial Position. These differences are recognised in the Statement of Comprehensive Income in the period in which the entity is disposed. Exchange differences arising on the translation of non-monetary items are recognised directly in equity to the extent that the gain or loss is directly recognised in equity, otherwise the exchange difference is recognised in the Statement of Comprehensive Income.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

f) Income tax

Income tax on the profit and loss for the year comprises current and deferred tax. Income tax is recognised in the Statement of Comprehensive Income, except to the extent that it relates to items recognised directly to equity, in which case it is recognised in equity. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the Statement of Financial Position date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the Statement of Financial Position liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantially enacted at the Statement of Financial Position date and are expected to apply when the deferred tax asset is realised or the deferred tax liability is settled. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Tax consolidation

The Company is the head entity of the tax consolidated group comprising all the Australian wholly owned subsidiaries. The implementation date for the tax consolidated group was 31 May 2006. Current tax expense/income, deferred tax liabilities and deferred tax assets arising from temporary differences of the members of the tax consolidated group are recognised in the separate financial statements of the members of the tax consolidated group using a "stand alone basis without adjusting for intercompany transactions" approach by reference to the carrying amounts of assets and liabilities in the separate financial statements of each entity and the tax values applying under consolidation.

Any current tax Australian liabilities (or assets) and deferred tax assets arising from unused tax losses of the subsidiaries is assumed by the head entity in the tax consolidated group and are recognised as amounts payable (receivable) to (from) other entities in the tax consolidated group. Any difference between these amounts is recognised by the head entity as an equity contribution or distribution.

The Company recognises deferred tax assets arising from unused tax losses of the tax consolidated group to the extent that it is probable that future taxable profits of the tax consolidated group will be available against which the asset can be utilised.

Any subsequent period adjustments to deferred tax assets arising from unused tax losses as a result of revised assessments of the probability of recoverability is recognised by the head entity only.

g) Property, plant and equipment

Plant and equipment is measured at cost less accumulated depreciation and impairment losses.

The cost of fixed assets constructed within the economic entity includes the cost of materials, direct labour, borrowing costs and an appropriate proportion of fixed and variable overheads. Subsequent costs are included in the asset’s carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the Statement of Comprehensive Income during the financial period in which they are incurred.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Impairment

The carrying amount of plant and equipment is reviewed annually by Directors to consider impairment. The recoverable amount is assessed on the basis of the expected net cash flows that will be received from the assets employment and subsequent disposal. The expected net cash flows have been discounted to their present values in determining recoverable amounts.

Depreciation

The depreciable amount of all fixed assets including capitalised lease assets are depreciated on a straight-line basis over their useful lives commencing from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

Depreciation is calculated on a straight-line basis over the estimated useful life of the asset as follows:

	Basis	Method
Plant and equipment	5 - 33%	Straight-line method
Leasehold Improvements	20 - 50%	Straight-line method
Motor vehicles	20 - 25%	Straight-line method

	New Patents and licences	Technegas Development costs
Useful lives	Patents - Finite Licenses - Infinite	Finite
Method used	8 - 10 years - Straight line	9 years - Straight line
Impairment test / Recoverable Amount testing	Annually and where an indicator of impairment exists	Amortisation method reviewed at each financial year-end; Reviewed annually for indicator of impairment

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the Statement of Comprehensive Income in the year the item is derecognised.

h) Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of assets that necessarily take a substantial period of time to prepare for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in the Statement of Comprehensive Income in the year in which they are incurred.

Borrowing costs include interest, amortisation of discounts or premiums relating to borrowings, amortisation of ancillary costs incurred in connection with arrangement of borrowings, foreign exchange losses net of hedged amounts on borrowings, including trade creditors and lease finance charges.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

i) Intangibles

Intangible assets

Intangible assets acquired separately are capitalised at cost and from a business combination are capitalised at fair value as at the date of acquisition. Following initial recognition, the cost model is applied to the class of intangible assets.

The useful lives of these intangible assets are assessed to be either finite or indefinite. Where amortisation is charged on assets with finite lives, this expense is taken to the Statement of Comprehensive Income through the 'depreciation and amortisation' line item.

Intangible assets, excluding development costs, created within the business are not capitalised and expenditure is charged against profits in the year in which the expenditure is incurred.

Intangible assets are tested for impairment where an indicator of impairment exists, and in the case of indefinite life intangibles, at each reporting date, either individually or at the cash generating unit level. Useful lives are also examined on an annual basis and adjustments, where applicable, are made on a prospective basis.

Research and development costs

Expenditure on research activities is recognised as an expense when incurred.

Expenditure on development activities is capitalised only when it is probable that future benefits will exceed deferred costs and these benefits can be reliably measured. Capitalised development expenditure is stated at cost less accumulated amortisation. Amortisation is calculated using a straight-line method to allocate the costs over a period during which the related benefits are expected to be realised.

Expenditure on the development of the TechnegasPlus generator has been capitalised. A useful life of 9 years has been applied and amortisation for the year included in the Statement of Comprehensive Income. No impairment provision has been deemed appropriate. The Directors are satisfied that the future economic benefits will eventuate to justify the capitalisation of the expenditure incurred.

Development expenditure is tested annually for impairment or more frequently if events or changes in circumstances indicate that it might be impaired. Capitalised development expenditure is measured at cost less any accumulated amortisation and impairment losses.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

j) Inventories

Inventories are valued at the lower of cost and net realisable value where net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

Costs incurred in bringing each product to its present location and conditions are accounted for as follows:

- Raw materials: purchase cost on a first-in, first-out basis;
- Finished goods and work-in-progress: cost of direct materials and labour and an appropriate portion of manufacturing overheads based on normal operating capacity but excluding borrowing costs.

k) Trade and other receivables

Trade receivables, which generally have 30-90 day terms, are recognised and carried at original invoice amount less an allowance for any uncollectible amounts. A specific estimate for doubtful debts is made when collection of the full amount is no longer probable. Bad debts are written off when identified.

l) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, deposits held at call with banks, short-term deposits with an original maturity of three months or less and bank overdrafts. For the purposes of the Statement of Cash Flows, cash and cash equivalents consist of cash and cash equivalents as defined above.

m) Trade and other payables

Trade payables and other payables are carried at amortised cost and represent liabilities for goods and services provided to the Group prior to the end of the financial year that are unpaid and arise when the Group becomes obliged to make future payments in respect of the purchase of these goods and services. Trade payables are normally settled within 30 to 60 days.

n) Interest-bearing loans and borrowings

All loans and borrowings are initially recognised at cost, being the fair value of the consideration received net of issue costs associated with the borrowing. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate method. Amortised cost is calculated by taking into account any issue costs and any discount or premium on settlement. Gains and losses are recognised in the Statement of Comprehensive Income when the liabilities are derecognised and as well as through the amortisation process.

o) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of past events, for which it is probable that an outflow of economic benefits will result and that an outflow can be reliably measured. Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the Statement of Comprehensive Income net of any reimbursement.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

p) Employee entitlements

Provision is made for employee benefits accumulated as a result of employees rendering services up to the reporting date. These benefits include wages and salaries, annual leave and long service leave.

Employee benefits expected to be settled within twelve months of the reporting date are measured at their nominal amounts based on remuneration rates which are expected to be paid when the liability is settled plus related on-costs. All other employee benefit liabilities are measured at the present value of the estimated future cash outflow (after applying probability) to be made in respect of services provided by employees up to the reporting date. In determining the present value of future cash outflows, the market yield as at the reporting date on national government bonds, which have terms to maturity approximating the terms of the related liability, are used.

Employee benefit expenses and revenues arising in respect of wages and salaries, non-monetary benefits, annual leave, long service leave and other leave benefits; and other types of employee benefits are recognised against profits on a net basis in their respective categories.

q) Employee share and performance share schemes

The fair value of performance rights issued under the Cyclopharm Long Term Incentive Plan are recognised as a personnel expense over the vesting period with a corresponding increase in Employee Equity Benefits Reserve.

The fair value of performance the implied option attached to shares granted is determined using a pricing model that takes into account factors that include exercise price, the term of the performance option, the vesting and performance criteria, the share price at grant date and the expected price volatility of the underlying share. The fair value calculation excludes the impact of any non market vesting conditions. Non market vesting conditions are included in assumptions about the number of performance options that are expected to become exercisable. At each balance date, the entity revises its estimate of the number of performance rights that are expected to become exercisable. The personnel expense recognised each period takes into account the most recent estimate.

Shares issued under employee and executive share plans are held in trust until vesting date. Unvested shares held by the trust are consolidated into the group financial statements.

r) Leases

Operating Leases

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognised as an expense in the Statement of Comprehensive Income on a straight-line basis over the lease term. Lease incentives under operating leases are recognised as a liability and amortised on a straight-line basis over the life of the lease.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

s) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

Sale of goods

Revenue is recognised (net of returns, discounts and allowances) when the significant risks and rewards of ownership and therefore control of the goods have passed to the buyer and can be measured reliably. Control is considered to have passed to the buyer at the time of delivery of the goods to the customer.

Interest

Revenue is recognised as the interest accrues using the effective interest rate method, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

All revenue is stated net of the amount of goods and services tax ("GST").

t) Other taxes

Revenues, expenses and assets are recognised net of the amount of GST except where the GST incurred is not recoverable from the Australian Taxation Office ("ATO"), and is therefore recognised as part of the asset's cost or as part of the expense item. Receivables and payables are stated inclusive of GST. The net amount of GST recoverable from, or payable to, the ATO is included as part of receivables or payables in the Statement of Financial Position. Cash flows are presented in the Statement of Cash Flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to the taxation authority are classified as operating cash flows.

u) Financial instruments

Financial assets and liabilities are recognised when the entity becomes a party to the contractual provisions to the instrument.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are stated at amortised cost using the effective interest rate method.

De-recognition of financial instruments

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss.

Impairment of financial assets

The Group assesses at each Statement of Financial Position date whether a financial asset or group of financial assets is impaired.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

v) Contributed equity

Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Other contributed equity

In accordance with *UIG 1052 Tax Consolidation Accounting*, additional contributed equity was recorded to recognise the transfer of tax liabilities from Vita Medical Limited to Vita Life Sciences Limited, being the parent of the Australian tax consolidated group at the relevant time. This event occurred prior to Cyclopharm acquiring its interests in the net assets of Vita Medical Limited.

As part of the restructure a subsidiary of Cyclopharm, Vita Medical Australia Pty Ltd acquired all the assets, liabilities and business from Vita Medical Limited, the former group parent.

With effect from 31 May 2006, Cyclopharm also acquired 100% of the other group operating subsidiaries from the ultimate holding company, Vita Life Sciences Limited. Accordingly, the group comprises Cyclopharm and the following wholly owned subsidiaries:

- Cyclomedica Australia Pty Ltd (formerly Vita Medical Australia Pty Ltd)
- Cyclomedica Ireland Ltd (formerly Vitamedica Europe Ltd)
- Cyclomedica Europe Ltd
- Cyclomedica Canada Limited (formerly Vita Medical Canada Ltd)
- Cyclomedica Germany GmbH
- Allrad 28 Pty Ltd
- Allrad 29 Pty Ltd

These entities collectively comprise the medical diagnostic equipment and associated consumables business formerly operated as the Vita Medical Group – now known as the Cyclopharm Group. The transaction has been accounted for as a 'reverse acquisition' as defined in *AASB 3 Business Combinations* whereby Cyclopharm is the legal parent and Cyclomedica Australia Pty Limited is the financial parent, which for accounting purposes is deemed to be the acquirer.

The consideration for the minority interests of the controlled entities and costs of acquisition have been charged to other contributed equity in accordance with *AASB 127 Consolidated and Separate Financial Statements*.

w) Earnings per share

Basic earnings per share

Basic earnings per share is determined by dividing the net profit/(loss) after income tax attributable to members of the Company by the weighted average number of ordinary shares outstanding during the financial year. Where there is a change in the number of ordinary shares on issue without a corresponding change in recognised resources during the year, the number of ordinary shares for all periods presented are correspondingly adjusted as if the event had occurred at the beginning of the earliest period presented.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares. Where there is a change in the number of ordinary shares on issue without a corresponding change in recognised resources during the year, the number of ordinary shares for all periods presented are correspondingly adjusted as if the event had occurred at the beginning of the earliest period presented.

x) Fair Value

The Group subsequently measures some of its assets at fair value on a non-recurring basis. Fair value is the price the Group would receive to sell an asset in an orderly (ie unforced) transaction between independent, knowledgeable and willing market participants at the measurement date.

As fair value is a market-based measure, the closest equivalent observable market pricing information is used to determine fair value. Adjustments to market values may be made having regard to the characteristics of the specific asset. The fair values of assets that are not traded in an active market are determined using one or more valuation techniques. These valuation techniques maximise, to the extent possible, the use of observable market data.

To the extent possible, market information is extracted from either the principal market for the asset (ie the market with the greatest volume and level of activity for the asset) or, in the absence of such a market, the most advantageous market available to the entity at the end of the reporting period (ie the market that maximises the receipts from the sale of the asset after taking into account transaction costs and transport costs). For non-financial assets, the fair value measurement also takes into account a market participant's ability to use the asset in its highest and best use or to sell it to another market participant that would use the asset in its highest and best use.

y) Significant Accounting Judgements and Estimates

The preparation of financial statements requires management to make judgements, estimates and assumptions that effect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses.

The following are the critical judgements and estimates that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

Key Estimates

Impairment – general

The Group assesses impairment at the end of each reporting period by evaluating conditions and events specific to the Group that may be indicative of impairment triggers. Recoverable amounts of relevant assets are reassessed using value-in-use calculations which incorporate various key assumptions.

The Group's property, plant and equipment relating to the Cyclotron facility have been fully impaired, based on management's assessment that the fair value of those assets is nil in the current industry circumstances and the condition of the damaged assets. Refer to Note 10.

The assumptions used in the estimation of recoverable amount and the carrying amount of intangible assets are discussed in Note 12. No impairment has been recognised in respect of intangible assets at the end of the reporting period.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Useful lives of property, plant and equipment

The estimation of the useful lives of assets has been based on historical experience as well as lease terms and turnover policies. In addition, the condition of the assets is assessed at least once per year and considered against the remaining useful life. Adjustments to useful lives are made when considered necessary.

Share based payment transactions

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact expenses and equity.

The Group measures the cost of share-based payments at fair value at the grant date using the Black-Scholes formula, taking into account the terms and conditions upon which the instruments were granted. Refer to Note 22 for details of the Company's Share Based Payment Plan.

3. SEGMENT REPORTING

The Group's primary segment reporting format is business segments as the Group's risks and returns are affected predominantly by differences in the products and services produced. The Group's secondary segment is geographical.

The operating businesses are organised and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets.

The Technegas segment is a supplier of diagnostic equipment and consumables used by physicians in the detection of pulmonary embolism.

The Molecular Imaging segment will produce radiopharmaceuticals to be used by physicians in the detection of cancer, neurological disorders and cardiac disease.

Transfer prices between business segments are set on an arm's length basis in a manner similar to transactions with third parties. Segment revenue, segment expense and segment result include transfers between business segments. Those transfers are eliminated on consolidation.

Business segments

The tables under the heading business segments present revenue and profit information and certain asset and liability information regarding business segments for the years ended 31 December 2014 and 31 December 2013.

Geographical segments

The tables under the heading geographical segment present revenue and profit information and certain asset and liability information regarding geographical segments for the years ended 31 December 2014 and 31 December 2013.

Net carrying amount	**339,075**	**15,796**	**43,698**	**6,778**	**405,347**

* Impairment arising from the Group's decision to cease commercial production at its cyclotron facility at the end of April 2014. The Group initially recognises and measures its Land and Buildings, Plant and Equipment and Leasehold Improvements at cost. The Group subsequently measures some of its Buildings, Plant and Equipment and its Leasehold Improvements at fair value on a non-recurring basis in accordance with AASB 136*: Impairment of Assets.* Refer Note 2 (x).

Fair Value Measurement

AASB 13 Fair Value Measurement requires the disclosure of fair value information by level of the fair value hierarchy, which categorises fair value measurements into one of three possible levels based on the lowest level that an input that is significant to the measurement can be categorised into, as follows:

- Level 1: Measurements based on quoted prices in active markets for identical assets that the entity can access at the measurement date.
- Level 2: Measurements based on inputs other than the quoted prices included in Level 1, but that are observable for the asset, either directly or indirectly.
- Level 3: Measurements based on unobservable inputs for the asset or liability.

Cyclopharm's management considers that the inputs used for the fair value measurement are Level 2 inputs.

10. PROPERTY, PLANT AND EQUIPMENT (continued)

Valuation techniques

AASB 13 requires the valuation technique used to be consistent with one of the following valuation approaches:

- Market approach: techniques that use prices and other information generated by market transactions for identical or similar assets.
- Income approach: techniques that convert future cash flows or income and expenses into a single discounted present value.
- Cost approach: techniques that reflect the current replacement cost of an asset at its current service capacity.

The Cyclopharm Board decided to cease commercial production at its Cyclotron facility at the end of April 2014 due to the impact on the Group's profits of the government-owned competition from PetNet, a subsidiary of Federal Government owned ANSTO. In making that decision, the Board valued the Cyclotron facility, comprised of buildings, leasehold improvements and plant and equipment at a fair value of nil, using the market approach and income approach techniques. The market technique predominantly used recent observable market data for similar new equipment in Australia, adjusted for loss in value caused by physical deterioration, functional obsolescence, economic obsolescence and the particular industry specific aspects affecting this highly specialised asset i.e. the government-owned competition which had rendered further participation in the molecular imaging industry uneconomic and its future use uncertain. The same industry specific factors were applied to the income approach technique. Both techniques resulted in a fair value of nil being recognised for the Cyclotron facility as at 31 December 2013. Cyclopharm considers that the same conditions still apply at 31 December 2014. Furthermore, the damage caused to the Cyclotron during the current financial year has delayed any decisions about the future use of the Cyclotron until it is restored to its former functionality. Accordingly, Cyclopharm has concluded that as a result of this uncertainty, the fair value of the Cyclotron remains at nil as at 31 December 2014.

Inputs used in the market approach technique to measure Level 2 fair values were:

- current replacement cost of the property being appraised less the loss in value caused by physical deterioration, functional obsolescence and economic obsolescence, and industry specific factors set out above.
- historical cost and relevant market data and industry expertise,
- sales comparison for assets where available.

The assessments of the physical condition, functional obsolescence and economic obsolescence are considered Level 3 inputs.

Non-Recurring fair value measurements:

	Level 2 2014 $	**Level 2 2013 $**
Buildings	-	-
Plant and equipment	-	-
Leasehold improvements	-	-
Total non-financial assets recognised at fair value	-	-

The highest and best use of the assets in normal circumstances is the value in continued use, using the income approach technique. However, in the current unusual circumstances as set out above, the fair value using this approach is nil.

11. INVESTMENTS ACCOUNTED FOR USING THE EQUITY METHOD

	Consolidated 2014 $	Consolidated 2013 $
Associated companies	-	-

Name	Principal Activities	Principal place of business	Measurement Method	Ownership Interest 2014	Ownership Interest 2013
Macquarie Medical Imaging Pty Ltd	Imaging centre	Sydney, Australia	Equity method	20%	20%

Macquarie Medical Imaging Pty Ltd is a private entity that provides medical imaging facilities for Macquarie University Hospital. The Group's interest in the company represents a strategic investment which provides synergies towards the provision of a fully aligned and integrated diagnostic, therapeutic and research platform.

Macquarie Medical Imaging Pty Ltd	Notes	Consolidated 2014 $	Consolidated 2013 $
At 1 January		-	-
(Repayment made by) / Loan to associate	(a)	(60,000)	252,640

Extract from the associate's statement of comprehensive income:	Notes	Consolidated 2014 $	Consolidated 2013 $
Revenue		10,338,774	8,258,117
Net Loss	(b)	(452,429)	(1,677,355)

(a) During the year, Cyclopharm's wholly owned subsidiary Cyclopet Pty Ltd received $60,000 in respect of a 2013 loan made to Macquarie Medical Imaging Pty Ltd, an imaging joint venture at Macquarie University Hospital. Cyclopet Pty Ltd has a 20% (2013: 20%) interest in Macquarie Medical Imaging Pty Ltd. As the amount had not been expected to be repaid in the short term as at 31 December 2014, it was included as an interest in the associate and a share of the associate's losses has been recognised under the equity method of accounting.

11. INVESTMENTS IN ASSOCIATE (continued)

(b) The share of the associate's loss not recognised during the year was $90,486 (2013: loss of $82,833) and the cumulative share of the associate's loss not recognised as at 31 December 2013 was $602,885 (31 December 2013: $515,188).

The fair value of the Group's investment in Macquarie Medical Imaging Pty Ltd was $nil (2013: $nil).

Contingent liabilities

(i) Cyclopharm Limited and CycloPet Pty Limited have jointly guaranteed with other investors to provide security for the whole Macquarie Medical Imaging Pty Ltd financing facility provided by the Commonwealth Bank of Australia. Cyclopharm Group's liability is limited to the amount that Cyclopharm Limited and CycloPet Pty Ltd are obliged to fund under a Subscription Agreement being 20% of the gross liability amount. The consolidated entity's contingent obligation at balance date was $1,972,551 (2013: $2,290,580).

(ii) Pursuant to a Shareholders' Agreement, CycloPet Pty Limited (a wholly owned subsidiary of Cyclopharm Limited) has undertaken to provide a put option to a 50% shareholder of Macquarie Medical Imaging Pty Limited ("MMI") such that if this option was exercised, Cyclopet would be required to purchase all Redeemable Preference Shares and Ordinary Shares held by the 50% joint venturer for the value of the Redeemable Preference Shares plus any accumulated interest plus $1 for the Ordinary Shares. The cost to CycloPet had the put option been issued and exercised at balance date is estimated not to exceed $1,274,695 (2013: $963,828). If the put option was issued and exercised, control of MMI would be transferred to the Group and MMI's financial statements would be consolidated from that date.

12. INTANGIBLE ASSETS

Consolidated	Intellectual Property $	Technegas Development $	Target $	Ultralute $	Total $
Balance at					
1 January 2014	107,486	38,954	27,419	309,654	483,513
Additions	8,939	33,349		237,031	279,319
Amortisation	(25,227)	(30,721)	-	-	(55,948)
Balance at					
31 December 2014	**91,198**	**41,582**	**27,419**	**546,685**	**706,884**

Total	**91,198**	**41,582**	**27,419**	**546,685**	**706,884**
31 December 2013					
Non-Current	107,486	38,954	27,419	309,654	483,513
Total	**107,486**	**38,954**	**27,419**	**309,654**	**483,513**

The recoverable amount of Technegas development and Ultralute costs have been assessed using a discounted cash flow methodology forecasting five years of pre-tax cash flows.

12. INTANGIBLE ASSETS (continued)

The following describes each key assumption on which management has based its value in use calculations:

(a) Five year pre-tax cash flow projections, based upon management approved budgets and growth rates covering a one year period, with the subsequent periods based upon management expectations of growth excluding the impact of possible future acquisitions, business improvement capital expenditure and restructuring.

(b) The discount factor used was 8.85% in 2014.

(c) The Directors have concluded that the recoverable amount of the Ultralute costs and other intangibles exceed their carrying value.

13. TRADE AND OTHER PAYABLES

		Consolidated	
		2014	2013
	Notes	$	$

(b) Secured Bank Loans

Cyclopharm had a flexible rate loan provided by the National Australia Bank which was fully repaid in August 2014. The facility was secured by a first registered mortgage debenture over Cyclopharm Limited and a guarantee and indemnity from Cyclomedica Australia Pty Ltd, CycloPET Pty Ltd, Allrad No. 28 Pty Ltd and Allrad No. 29 Pty Ltd. The National Australia Bank has discharged the registered Fixed and Floating Charge and First Registered Debenture charges over these companies.

Cyclopharm's wholly owned subsidiary, Cyclomedica Ireland Limited, has a flexible rate loan provided by the Allied Irish Banks, plc. with a repayment period of 7 years. The facility is secured by a registered Fixed and Floating Charge and First Registered Debenture over Cyclomedica Ireland Limited and a guarantee from Cyclomedica Europe Limited.

The Group has complied with all its banking covenants for the year ended 31 December 2014.

Ordinary shares have the right to receive dividends as declared and, in the event of winding up the Company, to participate in the proceeds from the sale of all surplus assets in proportion to the number of and amounts paid up on shares held. Ordinary shares entitle their holder to one vote, either in person or by proxy, at a meeting of the Company.

(i) 1,723,456 Long Term Incentive Plan shares were issued on 1 September 2014 as set out on Note 22.
(ii) These are costs related to a capital raising exercise completed on 14 December 2012 comprising a pro-rata renounceable entitlement offer to eligible shareholders of 1 share for every 4 shares held by eligible shareholders at an issue price of $0.18 per rights share resulting in the issue of 11,625,805 shares.
(iii) The Company cancelled 1,786,849 expired Long Term Incentive Plan shares on 25 November 2014.

16. CONTRIBUTED EQUITY (continued)

When managing capital, management's objective is to ensure the entity continues as a going concern as well as to maintain optimal returns for shareholders and benefits for other stakeholders. Management also aims to maintain a capital structure that ensures the lowest cost of capital available to the entity.

Management constantly assess the capital structure to take advantage of favourable costs of capital and/or high returns on assets. As the market in continually changing, management may issue dividends to shareholders, issue new shares, increase its short or long term borrowings or sell assets to reduce borrowings.

The Directors did not declare a dividend during the financial year ended 31 December 2014.

Management monitor capital through the gearing ratio (net debt/total capital). Management aim to ensure that the Group's gearing ratio does not exceed 45%. The Group has complied with all banking covenants for the year ended 31 December 2014.

		Consolidated	
		2014	2013
	Notes	$	$
Total interest bearing loans and borrowings		245,731	2,416,986

Net (cash) / debt		**(3,022,694)**	**1,196,340**
Total equity		7,756,160	3,170,106
Gearing ratio		0.0%	37.7%

17. FINANCIAL RISK MANAGEMENT OBJECTIVES

The Group's principal financial instruments comprise receivables, payables, bank loans, cash and short-term deposits. The Group manages its exposure to key financial risks, including interest rate and currency risk in accordance with the Group's financial risk management policy. The objective of the policy is to support the delivery of the Group's financial targets while protecting future financial security.

The Group uses different methods to measure and manage different types of risks to which it is exposed. These include monitoring levels of exposure to interest rate, foreign exchange risk and assessments of market forecasts for interest rate, foreign exchange and commodity prices. Ageing analysis and monitoring of specified credit allowances are undertaken to manage credit risk, liquidity risk is monitored through the development of future rolling cash flow forecasts.

The Board review and agrees policies for managing each of these risks as summarised below.

Primary responsibility for identification and control of financial risks rests with the Audit and Risk Management Committee under the authority from the Board. The Board reviews and agrees policies for managing each of the risks identified below, including for interest rate risk, credit allowances and cash flow forecast projections. It is, and has been throughout the year under review, the Group's policy that no trading in financial instruments shall be undertaken.

17. FINANCIAL RISK MANAGEMENT OBJECTIVES (continued)

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument are disclosed in Note 2.

(a) Interest rate risk

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's long term debt obligations with a floating interest rate. The Group's policy is to manage its interest cost using a mix of fixed and variable rate debt. The Group constantly analyses its interest rate exposure. Within this analysis consideration is given to potential renewals of existing positions, alternative financing, positions and the mix of fixed and variable interest rates.

The following sensitivity analysis is based on the interest rate risk exposures in existence at the Statement of Financial Position date.

At 31 December 2014, if interest rates had moved, as illustrated in the table below, with all other variables held constant, pre-tax profit would have been affected as follows:

	Consolidated	
	2014	**2013**
	$	**$**
Judgements of reasonably possible movements:		
Profit / (Loss) before income tax		
+1.0% (100 basis points)	(13,229)	(30,000)
-0.5% (50 basis points)	6,614	15,000

The movements in profit are due to possible higher or lower interest costs from variable rate debt and cash balances.

Notes

Continued

17. FINANCIAL RISK MANAGEMENT OBJECTIVES (continued)

At balance date, the Group had the following mix of financial assets and liabilities exposed to variable interest rate risk:

(a) Interest rate risk (continued)

Consolidated Year ended 31 December 2014		Weighted average interest rate %	Non interest bearing $	Floating interest rate $	Floating interest maturing in 1 year or less $	 1 to 5 years $	Total $

Net exposure			**1,759,118**	**1,220,646**	**(2,416,986)**	**-**	**562,778**

17. FINANCIAL RISK MANAGEMENT OBJECTIVES (continued)

(b) Credit risk

Credit risk arises from the financial assets of the Group, which comprise cash and cash equivalents and trade and other receivables. The Group's exposure to credit risk arises from potential default of the counter party, with a maximum exposure equal to the carrying amount of these instruments. Exposure at balance date is addressed in each applicable note.

The Group does not hold any credit derivatives to offset its credit exposure.

The Group trades only with recognised, creditworthy third parties and as such collateral is not requested nor is it the Group's policy to scrutinise its trade and other receivables. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures such as reviewing their industry reputation, financial position and credit rating. In addition, receivable balances are monitored on an ongoing basis with the result that the Group's exposure to bad debts is constantly managed.

There are no significant unprovided concentrations of credit risk within the Group.

(c) Liquidity risk

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts and bank loans.

The Group's policy is to monitor the maturity of borrowings at all times. At 31 December 2014, 19% of the Group's debt will mature in less than one year (2013: 100%).

Refer to the table above with the heading 17 (a) Cash flow interest rate risk which reflects all contractually fixed pay-offs for settlement of financial liabilities and collection of financial assets. Trade payables and other financial liabilities generally originate from the financing of assets used in our ongoing operations such as investments in working capital eg. inventories and trade receivables and investment in property, plant and equipment. These assets are considered in the Group's overall liquidity risk. To monitor existing financial assets and liabilities as well as to enable an effective controlling of future risks, the board and management monitors the Group's expected settlement of financial assets and liabilities on an ongoing basis.

The Group monitors rolling forecast of liquidity reserves on the basis of expected cash flow. At balance date the Group has no unused credit facilities (2013: $nil).

Consolidated Year ended		Less than 6 months	6 months to 1 year	1 year to 5 years	Greater than 5 years	Total
31 December 2014	**Note**	**$**	**$**	**$**	**$**	**$**

Secured bank loans, third party	14	1,200,000	1,200,000	-	-	2,400,000
		3,069,833	1,216,986	-	-	4,286,819

17. FINANCIAL RISK MANAGEMENT OBJECTIVES (continued)

(d) Commodity price risk

The Group's exposure to commodity price risk is minimal.

(e) Foreign currency risk

As a result of significant investment operations in Europe, the Group's Statement of Financial Position can be affected significantly by movements in the EURO / A$ exchange rates. The Group does not hedge this exposure.

The Group also has transactional currency exposures. Such exposure arises from sales or purchases by an operating unit in currencies other than the unit's functional currency. Approximately 72% (2013: 66%) of the Group's sales are denominated in currencies other than the functional currency of the operating unit making the sale, whilst approximately 67% (2013: 56%) of costs are denominated in the unit's functional currency.

At 31 December 2014, the Group had the following financial instrument exposure to foreign currency fluctuations:

	Consolidated	
	2014	**2013**
	$	**$**
United States dollars		
Amounts payable	98,834	334,657
Amounts receivable	16,749	18,044
Euros		
Amounts payable	274,881	117,628
Amounts receivable	1,683,953	2,732,607
Canadian dollars		
Amounts payable	2,011	10,244
Amounts receivable	711,958	290,691
Japanese Yen		
Amounts payable	37,106	-
Amounts receivable	51,156	-
Chinese Renminbi		
Amounts payable	104,433	-
Amounts receivable	-	-
Net exposure	**(1,946,551)**	**(2,578,813)**

Management believe the balance date risk exposures are representative of the risk exposure inherent in the financial instruments.

Fair values

All of the Group's financial instruments recognised in the Statement of Financial Position have been assessed at their fair values.

17. FINANCIAL RISK MANAGEMENT OBJECTIVES (continued)

(e) Foreign currency risk (continued)

Foreign currency sensitivity

Currency risk is measured using sensitivity analysis. A portion of Cyclopharm's receivables and payables are exposed to movements in the values of those currencies relative to the Australian dollar. Cyclopharm management have determined that it is not cost effective to hedge against foreign currency fluctuations.

Cyclopharm is exposed to European Euro (Euro), Canadian Dollar (CAD) and US Dollar (USD) movements. The following table details Cyclopharm's sensitivity to a 10% change in the Australian dollar against respective currencies with all other variables held constant as at reporting date for unhedged foreign exposure risk. A positive number indicates an increase in net profit/equity.

A sensitivity has been selected as this is considered reasonable given the current level of exchange rates and the volatility observed on a historic basis and market expectation for future movement.

	Consolidated	
	Increase in AUD of 10%	Decrease in AUD of 10%
	$	$

18. COMMITMENTS & CONTINGENCIES

(a) Operating lease commitments

Future minimum rentals payable under non-cancellable operating leases are as follows:

	Consolidated	
	2014	2013
	$	$
Operating Lease Commitments		
Minimum lease payments		
Due not later than one year	416,482	449,105
Due later than 1 year & not later than 5 years	933,682	1,250,535
More than 5 years	553,224	633,371
Total operating lease commitments	**1,903,388**	**2,333,011**
Operating lease expenses recognised as an expense during the year	327,150	488,765

- The Group has entered into commercial leases on office space within certain buildings. These leases have an average life of between 3 to 5 years with renewal options included in the contracts. There are no restrictions placed upon the lessee by entering into these leases.
- Cyclopet Pty Ltd has entered into a commercial lease for the PET Facility at Macquarie University Hospital. The lease has a term of 10 years and commenced upon commissioning of the Hospital in June 2010.
- The Group also has entered into commercial leases on motor vehicles that have an average life of approximately 3 to 4 years.

(b) Finance lease commitments

		Consolidated	
		2014	2013
	Notes	$	$
Finance Lease Commitments			
Minimum lease payments			
Due not later than one year	(i)	-	16,986
Total finance lease commitments		**-**	**16,986**

(i) The Group also has entered into a commercial lease on motor vehicles that have a life of 5 years. This lease is secured against the underlying assets and was fully repaid in December 2014.

18. COMMITMENTS & CONTINGENCIES (continued)

(c) Other commitments

		Consolidated	
		2014	2013
	Notes	$	$
The company has the following other commitments:			
Not later than one year		45,692	2,400,000
Due later than 1 year & not later than 5 years		182,768	-
More than 5 years		17,271	-
Total	(i) & (ii)	**245,731**	**2,400,000**

(i) Cyclopharm had a flexible rate loan provided by the National Australia Bank which was fully repaid in August 2014. The facility was secured by a first registered mortgage debenture over Cyclopharm Limited and a guarantee and indemnity from Cyclomedica Australia Pty Ltd, CycloPET Pty Ltd, Allrad No. 28 Pty Ltd and Allrad No. 29 Pty Ltd. The National Australia Bank has discharged the registered Fixed and Floating Charge and First Registered Debenture charges over these companies.

Cyclopharm's wholly owned subsidiary, Cyclomedica Ireland Limited, has a flexible rate loan provided by the Allied Irish Banks, plc. with a repayment period of 7 years. The facility is secured by a registered Fixed and Floating Charge and First Registered Debenture over Cyclomedica Ireland Limited and a guarantee from Cyclomedica Europe Limited.

(ii) The Group has complied with all its banking covenants for the year ended 31 December 2014.

(d) Capital commitments

There were no capital commitments as at the date of this report (2013: $nil).

(e) Contingent liabilities

(i) Cyclopharm Limited and CycloPet Pty Limited have jointly guaranteed with other investors to provide security for the whole Macquarie Medical Imaging Pty Ltd financing facility provided by the Commonwealth Bank of Australia. Cyclopharm Group's liability is limited to the amount that Cyclopharm Limited and CycloPet Pty Ltd are obliged to fund under a Subscription Agreement being 20% of the gross liability amount. The consolidated entities' contingent obligation at balance date was $1,972,551 (2013: $2,290,580).

18. COMMITMENTS & CONTINGENCIES (continued)

(e) Contingent liabilities

(ii) Pursuant to a Shareholders' Agreement, CycloPet Pty Limited (a wholly owned subsidiary of Cyclopharm Limited) has undertaken to provide a put option to a 50% shareholder of Macquarie Medical Imaging Pty Limited ("MMI") such that if this option was exercised, Cyclopet would be required to purchase all Redeemable Preference Shares and Ordinary Shares held by the 50% joint venturer for the value of the Redeemable Preference Shares plus any accumulated interest plus $1 for the Ordinary Shares. The cost to CycloPet had the put option been issued and exercised at balance date is estimated not to exceed $1,274,695 (2013: $963,828). If the put option was issued and exercised, control of MMI would be transferred to the Group and MMI's financial statements would be consolidated from that date.

19. RELATED PARTY DISCLOSURES

The consolidated financial statements include the financial statements of Cyclopharm and its subsidiaries as stated below.

The following table provides the total amount of transactions that were entered into with related parties for the relevant financial year (for information regarding outstanding balances at year-end, refer to Note 8 Trade and other receivables, Note 13 Trade and other payables and Note 14 Interest bearing loans and borrowings):

CONSOLIDATED		Sales to related parties $	Purchases from related parties $	Repayment from / (loan to) related parties $	Amounts owed by related parties $	Provision for doubtful debts on Amounts owed by related parties $
Pilmora Pty Ltd	*2014*	-	31,827	-	-	-
	2013	-	-	-	-	-
Macquarie Medical Imaging	*2014*	34,675	-	60,000	230,782	230,782
	2013	100,006	-	(60,000)	192,640	192,640

Ultimate parent entity

Cyclopharm Limited is the ultimate parent entity in the wholly owned group.

Terms and conditions of transactions with related parties

- During the year, payments of $31,827 (2013: $nil) were made to Pilmora Pty Ltd (an entity controlled by Mr Townsing). All payments related to Mr Townsing's role as a non-executive director.
- Cyclopet Pty Ltd, a wholly owned subsidiary of Cyclopharm has a 20% interest in Macquarie Medical Imaging. Cyclopet manufactures products that are sold to Macquarie Medical Imaging. Cyclopet Pty Ltd received a repayment of $60,000 which it had loaned to Macquarie Medical Imaging in 2013. A share of the associate's losses had been recognised under the equity method in 2013 as it was not expected to be repaid in the short term. The share of the associate's losses has been reversed during the current period in view of the amount received. As the loan amount and trade debtor balance of $230,782 (2013: $192,640) are not expected to be repaid in the short term, they are included as an interest in the associate and a share of the associate's losses has been recognised under the equity method as disclosed in Note 11.

19. RELATED PARTY DISCLOSURES (continued)

Controlled Entities

Name	Note	Country of Incorporation	Percentage of equity interest held 2014	2013

Notes

1. Cyclopharm Limited is the ultimate parent entity in the wholly owned group.
2. Audited by Russell Bedford NSW, Australia.
3. Audited by Moore Stephens Nathans, Republic of Ireland.
4. Audited by Schwartz Levitsky & Feldman LLP, Toronto, Canada.
5. Audited by Bilzanzia GmbH Wirtschaftsprufungsgesellschaft, Germany

20. EVENTS AFTER THE BALANCE DATE

No matters or circumstances have arisen since the end of the financial year, not otherwise dealt with in the financial report, which significantly affected or may significantly affect the operations of the Group, financial position or the state of affairs of the Group in future financial periods.

21. AUDITORS' REMUNERATION

The following total remuneration was received, or is due and receivable, by auditors of the Company in respect of:

	Consolidated	
	2014	2013
	$	$
Amounts received or due and receivable by Russell Bedford NSW and associated entities for:		
Audit and review of the financial statements	97,953	100,625
Other services:		
- tax compliance	7,689	10,000
- share registry	11,727	14,940
	117,369	**125,565**
Amounts received or due and receivable by auditors other than Russell Bedford NSW for:		
Audit of the financial statements	75,175	74,577
Other services	11,318	10,524
	86,493	**85,101**

22. SHARE BASED PAYMENT PLANS

(a) Recognised share-based payment expenses

The expense recognised for employee services received in relation to share based payments during the year is shown in the table below:

	Consolidated	
	2014	2013
	$	$
Expense arising from equity-settled share-based payment transactions (note 4)	26,674	13,032

The share based payment reserve to 31 December 2014 was $365,259 (2013: $338,585).

22. SHARE BASED PAYMENT PLANS (continued)

(b) Type of share based payment plans

The share-based payment plan is described below. There have not been any modifications to the Long Term Incentive Plan ("Plan") following its approval by members at the Annual General Meeting held on 8 May 2007.

Shares

Long Term Incentive Plan ("Plan") Shares ("Shares") are granted to certain executive Directors and certain employees.

In valuing transactions settled by way of issue of shares, performance conditions and market conditions linked to the price of the shares of Cyclopharm Limited are taken into account. All shares issued have market performance conditions so as to align shareholder return and reward for the Company's selected management and staff ("Participants").

The Shares vest upon the satisfaction of certain performance conditions ("Hurdles") within the term ("Term") specified for Participants in the Plan. The Board has residual discretion to accelerate vesting (i.e. Reduce or waive the Hurdles) and exercise of Shares in the event of a takeover or merger or any other circumstance in accordance with the terms of the Plan.

Shares in relation to which Hurdles have not been satisfied (i.e. that do not vest) will lapse and will not be able to be exercised, except in the circumstances described below. Shares which have not vested will lapse where a Participant ceases employment with Cyclopharm other than on retirement, redundancy, death or total and permanent disablement or unless as otherwise determined by the Board in its absolute discretion.

Where a Participant has ceased employment with Cyclopharm as a result of resignation, retirement, redundancy, death or total and permanent disablement prior to the end of a performance period, only shares that have vested may be retained by the Participant on a pro-rata basis. If an option holder ceases employment for any reasons mentioned above prior to the first anniversary of the grant date, the Participant forfeits all entitlement to Shares.

LTIP Shares issued

At the Annual General Meeting held on 8 May 2007, Shareholders approved the Company's Plan.

Options

AASB 2 Share Based Payments requires that the benefit to an employee arising from an employee share scheme such as the Cyclopharm Long Term Incentive Plan be treated as an expense in which the benefit is gained. No benefit to the employee arises from the Plan Shares as a corresponding loan applies to the issued Shares (although not required to be accounted for in the Financial Statements) instead the employee benefit is deemed to be the implied option ("Implied Option") arising from the Plan.

The International Financial Reporting Council have determined that where employee shares are issued under a non-recourse loan payment plan, the loan assets and the increment to share capital should not be recognised at grant date but rather, the transactions be treated as share options. Consequently the value of the discount which has been determined using a binomial pricing model will be charged to the Statement of Comprehensive Income over the vesting period. Other increments to share capital will be recognized as the share loans are settled by the relevant employees.

22. SHARE BASED PAYMENT PLANS (continued)

(c) Summary of shares granted

The following table illustrates the number of movements in share options during the current year:

	Consolidated 2014 Number	Consolidated 2013 Number	Weighted Average Exercise Price 2014 $	Weighted Average Exercise Price 2013 $
Balance at the beginning of the year	1,786,849	1,786,849	0.46	0.46
Granted during the year	1,723,456	-	0.24	-
Exercised during the year	-	-	-	-
Lapsed during the year	(1,786,849)	-	-	-
Balance at the end of the year	**1,723,456**	**1,786,849**	**0.24**	**0.46**

(d) Option pricing models

The following assumptions were used to derive a value for the Implied Options granted using the Black Scholes Option model as at the grant date, taking into account the terms and conditions upon which the Shares were granted:

Exercise price per Implied Option	$0.22	$0.25
Number of recipients	1	1
Number of Implied Options	861,728	861,728
Grant Date	1/09/2014	1/09/2014
Dividend yield	-	-
Expected annual volatility	21%	21%
Risk-free interest rate	9.00%	9.00%
Expected life of Implied Option (years)	2 years	2 years
Fair value per Implied Option	$0.071	$0.052
Share price at grant date	$0.25	$0.25
Model used	Black Scholes	Black Scholes

Expected volatility percentages used for the Option pricing calculations were determined using historic data over 24 months and were adjusted to reflect comparable companies in terms of industry and market capitalisation. The Implied Options arising from the Plan are not listed and as such do not have a market value.

23. PARENT ENTITY DISCLOSURE

	2014 $	2013 $
